

the Engineers

of Wishview Center

Maximum Group Size: 18 children at once Teacher-Child Ratio: 1 teacher per 10 children

Preschoolers are fun to be with because their creativity is grand! The engineers enjoy using a wide variety of drawing tools, collage elements, paints and sculpture materials. During this last year before going to kindergarten, writing, phonics and math skills increase rapidly. These children have class rules and jobs which help them take responsibility for their behavior choices and the organization of their classroom.

Approximate ages of children in this class

4 - 5 years old

At this age the children's hands, **hearts**, and minds are learning habits for life. Learning to follow school routines independently, practicing manners and solving social situations with kindness and respect are important goals for this phase of school readiness.
