

# the Magicians

of Wishview Center

Maximum Group Size: 12 children at once

Teacher-Child Ratio: 1 teacher per 6 children

Older toddlers love to move things and be active. They are clever and surprisingly quick! The Magicians classroom is a fun place where children are introduced to group time and playing in learning centers. Here you will see children playing with puzzles, pots and pans, toy cars, musical instruments, and building with blocks. Teachers keep magicians busy by giving them opportunities to talk, learn childhood songs, scribble and make handprints, listen to stories, dance, jump, balance and climb. –And most Magicians love to dig in the dirt!

Approximate ages of children in this class

18 months – 3 years old

Around this age there is often a burst of new language! Making friends and beginning to replace hitting/biting behaviors with words is wonderful to see. Learning the alphabet song, talking in full sentences and potty training become new achievements for many children in this age range.
